Dear Sir/Madam,

I am submitting an application for Frontend Developer position.

I got my Bachelor's degree in Information Technology from American University in Bosnia and Herzegovina, and SUNY Canton, since I was enrolled into a dual-degree program.

As far as my skills and background go, I have over five years of experience in web development. I have been designing and developing web applications right from their conceptual phases until "going live." I have good understanding and experience in HTML, CSS, JavaScript, but also in frameworks and tools such as Typescript, EmberJS, React, Redux, NodeJS, etc.

I must emphasize that I am open-minded and willing to learn new technologies and expand my skillset, which would benefit both your company and myself.

I am attaching my CV for your consideration.

Thank you in advance,
Emir Maljanovic
